ENVELOPE AND BAG DEPOSITORY CHUBB

**PERSONAL SAFETY** Personal Safety and crime on campus are shared responsibilities. The University's success in reducing crime is dependent upon the support of staff. By following the advice in this section and reporting any crimes to the University Police, you will not only improve your own security but will contribute to a University-wide effort of making the campus safer. Call Local 8-2222 for any emergency, including: \*smell of gas, smoke or fire \* Life safety \* Bomb threats \* Crimes in progress \* Accidents/sickness \* Suspicious persons or incidents

Notifying the police is an important part of crime prevention and personal protection. Do not endanger yourself and do not attempt to deal with suspicious or hazardous situations yourself. Call Local 8-2323 for non-emergency situations: \* Operation Provident: a free program consisting of engraving U of T property to deter theft \* Security alarm systems/advice with reference to computer and/or other valuable equipment \* Community Policing Officer assigned to your area \* Crime prevention information and/or seminars (i.e. Campus Watch) \* Disturbances and noise complaints \* Extra security for special events (please book early) \* Personal Safety (non-emergency) \* Interpersonal conflicts \* Assaults \* Threats \* Harassing/obscene phone calls \* Lectures and/or advice \* Security problems (insecure exterior doors) \* Safety/security audits \* Theft of property (personal or University) \* Vandalism (for repairs as a result of vandalism, call your property manager or call Local 8-3000)

**GENERAL ADVICE** The fear of being attacked or assaulted by another person affects our behaviour in many ways. We are governed by our own sense of personal security, whatever the reality, and alter our behaviour by either avoiding or preparing for what we consider 'risky' situations. Your perception of your own security in a situation is an important tool in reducing your vulnerability to attack. If you feel like you are in danger, change the way you do things so that you feel safer. Chances are you will be. There are some common situations and environments people encounter which may make you feel vulnerable. There are also some relatively simple ways to reduce the risks in those situations and improve both the perception and reality of your own safety. Attackers often avoid people who look secure, confident and strong. Plan to take a Protection Skills or Self Defense course offered - you will learn how to assert yourself in ways that will deter a would be attacker. Several colleges and departments subsidize or support these courses during the year. Athletics and recreation departments also offer self-defense and martial arts courses. The University offers an escort service; get to know the hours of operation and the service provided. Use them if you feel uncomfortable walking alone. Remember to take the dispatch number with you when you intend to be on campus at night. If you forget the number call the University Police, who will contact the service for you. Information about the Walksafer services can be found in this book. 200

ALERT Please contact University of Toronto Police at 416-978-2222 immediately of any suspicious behaviour or suspicious looking individual in the building. Thank you! 1 Spadina  
Safety Committee.
