PHILOSOPHICAL INVESTIGATIONS LUDWIC WITTGENSTEIN Profes: The choughts that I publish in what follows are the proceiging of philosophical investigations which have a impuring, in a sudden change, from one are to an onder. A originally it was my intention to thing this together in a book whose form I thought of affectiventy a different mine. But it seems to force them along a single track against their natural inclination.—And this was, of course, connected with the very nature of the investigation. For it computs to to travel criscarous in every change of the investigation and the property of the property of the computer of the property of the pro
should not like any writing to spare other possible the trouble of thinking. But if possible, to stimulate someone to thiosphas of his own. I beloudd have liked to produce a good book. It has not reasonable that the production is a supplied to the production of the desired production of the desired production of the desired production of the desired.— He is in this had making with the remaining kinds of word as something that will take care of itself. Now think of the following use of language: Isend someone shop ping, I gov him a slip of paper marked. The red and what he is no local way the red and what he is no down the word and what he is no down the word and what he is no down the word and what he is no down the red and what he is no down the three of any three productions are not to be a supplied to the production of the desired.— He is not have the production of the desired production. But one right intends of the desired production of the
patterns,) Now imagine concease countring that script as if there were just a [4] correspondence of lettern to sounds and as if the letters of load on the New completed different functions. Age primitive leasts of use in which concease carbot strawn by the papers and functioning of the words. A child use usus phrimitive forms of language with the tentioning of its words. And the strain the strain of the lettern of the lett
serve to modify something. So, a lummer modifies the position of a stall, a saw the shape of a board, and so on? And what is modified by a rule, a glusger and mailt a "Out tomoletege or murk, the assignant brings the tool of that has their mate on this. It is this way, and more of less stillar ways, a name signifies at string, and is given to a fining. A when philosophisms, it will often sentence. Yet in has a rule just like that of a colour sample in languageme (8): that is, it is a sample of what the other it meant to say; it is most natural, and cause; least confication if we consist that the other is now beginning to the at 100°. It is most not that the other is now beginn to be a 100°. It of the most include the other is now be the whole of the other in the other whose, of houses who texturions' means to imagine a form of life. But what about this is the call "Sale" in example (2) a sentence or a word! If a word, surely it has not be the same meaning as he like sounding wood of our a shortested from of the sentence. Telling me as als? and where it is now that the same consistence of the same meaning as he like sounding wood of our a shortested from of the sentence. Telling me as als? and there is no usual sentence in cample (2) a sentence or a word! If a word, surely it has not be the same meaning as he like sounding wood of our a shortested from of the sentence. Telling me as als? a "lampleming" in the like." — But we have a surely that the same consistence of the same meaning as he like sounding wood of our a shortested movement of the same meaning as he like sounding wood of our a shortested meaning as he like sounding wood of our a shortested movement of the same meaning as he like sounding wood of our a shortested movement of the same meaning as he like sounding wood of our a shortested meaning as he like sounding wood of our and the same meaning as he like sounding wood of our and the same meaning as he like sounding wood of our and the same meaning as he like sounding wood of our and the same meanin
corresponding perhaps to the word for "building stone" in his language. If he himself had then given this order, perhaps he would have possuonced it difficulty, and we'd any he pronounce of its consisting of four words withy our attenting the CO course position with language awith, contains those other sentences as well a but is this favoring omenting that "happent with when we uter is, has because it is shortened a in companion with a particular paradigm of our grammar. Of course someone might object being: "long rather the hostered and her unshall be a proper of the proper with the postered and her unshall be a proper of the proper with the pro
Fregañ asertion sign mark the beginning of a semience. So its function is like this of the full stop, It distinguishes the whole period from a clause within the period, If I hear someone spir mind det until a much and wait as place; and so on. One tempt tening the imaging or demantry; all this placure a semience raisale. Frege probably conceived of the amunipulation along these enterings and testing a hyporthesia. Presenting the results of an experiment in table and diagrams. A Making up a story; and reading one a facting in a play a Singing rounds a Guessing riddle of language. (B) this includes the number of the Tatearus Longo-Philosophisary, 1/2, Assonance who does not bear in minds the variety of language games will plershap be inclined to ask question of the period of language. (B) the period of th
even if it has the same grantific consequences, the same effect on the learner, [p. 14 n., 120 Perhaps someones will say, "two" can be contrawingly-defined only in this way. "This number is called "represent the form of the property of th
ones eyes so as not to see the constructions, and so torin. I want to say; this and similar fungisate what one occurrence while one affects ones attention to mis or mar. but it is the only three the suppose someone said: I always do the same thing when I attend to a shape. Hollow the contour with my eyes and the carried. "And suppose this person gives someone else the ostensive explain in what he points at, for example, when told "Point to a circle." a For neither the expression "to mean the explanation in such-and-such a way" nor the expression "to interpret the explanation."

I have set the pipute in the pipute it is a size of the pipute in the pipute is the size of the pipute in the pipute in the pipute is the size of the pipute in the pipute in the pipute is the pipute in the pipute in the pipute in the pipute is the pipute in the pipu
the word "length' is learnt by learning, among other things, what is to determine length. (That' why the word "methodology" has a double meaning, A physical investigation may be called? a but. Then is the critaria part that his is a maintised in people's actived. 340. While you can have complete critariany about someone elect state of min, all'll it always morely subject. (This is an importunt fact) a Were is otherwise if, for instance, one mathematician was convinced that a fagure had altered unperceived, or that his or someone elect sense to the property of the
counts, in one sents, mathematics is a body of knowledge, but still it is also an activity. And filte move' can exist only as the exception. For if what we now call by that name Secume the rid thing as colorabilitidines, and there are ways of acternatings. In Even is, in great-complete agreement in the colorabilities and endingerous departs. He has characterizes be a mark teacher in third: Certainly. From time to time be given him the right tip,
someone remembers something and says: "Yes, now I know what "remembering is, what it feel like to remember 2 an lobus go here a when I look out for a content." — But it could only he someone remembers something and says: "Yes, now I know what "remembering is, what it feel like to remember." 2 allow does he know that this feeling is "remembering." Compare. "Ves. hand, one might, perhaps, speak of a feeling. "Long, long ago," for there is a tone, a gesture, which go with certain tales of past times.) [23] xiv 371. The confusion and harrenness of pays: existence of the experimental method makes us think that we have the means of getting rid of the problems which trouble us, but problem and method pass one another by. 3.

completing for the last returns year. They concern many subjects the concepts of manning of a procession and enteror. It is given the foundation of mathematic, states of growth man, and when the belief the thought model and even dealer with the process of the p out the psychological ismosphere of a process is connected with that; O (In) immittion could have removed this double at I immittion is an inner vote a new for I know born I are to follow it? An allow do I know that a double at I immittion of the possible of the process is connected with that; O (In) immittion could have removed this double at I immittion is an inner vote and the process in the process is connected with that; O (In) immittion could have removed in the process is connected with that; O (In) immittion could have removed in the process is connected with that of the process is connected with the process is connected by a process in the process in the process is connected by a process in the process in the process is connected by a process in the process in the process is connected by a process in the process in the process is connected by a process in the process in the process is connected by a process in the process in the process is connected by a process in the process in the process is connected by a process in the process in the process is connected by a process in the process in the process is connected by a process in the process in the process is connected by a process in the process in the process is connected by a process in the process in the process is connected by a process in the process in the process in the process in the process is connected by a process in the process in the process in the process in the process is connected by a process in the proce in the codinary sense of the wore. Dut 1, for finance, would use have consequence with one as in the street, any Say to yourself, for example. The children over there are mere automata; all their liveliness is mere automatam. And you was extreet men used to say that the street is not example. The children over there are mere automata; all their liveliness is mere automatam. And you was extreet men or automatam. And you was extreet men or automatam is made and to say the same was to say that the sentence is not example. The children over there are mere automata; all their liveliness is mere automatam. And you was extreet men or automatam. And you was extreet men or automatam is made and to say the same was to say that the sentence is not example. The seems practicated in our Beautiful great to such that it is single report we should make tuch a medicy on the source of the same was to say that the sentence is not dispute its correctness. But what it is replication; This in or, the polytoniary limits of the picture of bindings and a street and a street and a street and a street, and a street and a street and a street and a street and the sentence is now of the picture of bindings and a street and the sentence is now of the picture of bindings and a street and a dispute its correctness. But want in a span-anary and a second of the se ri ing to softending that is red. 4.90. "Dut a rules against this object." It does not say that the object is a south of long. Bather, it is in itself a 1 mergened to sky a dead, and achieven nothing of what a thought can achieve. It is a at few that linguished by the contract of the c 1. Often it is only when we suppress the question "Why?" that we become some of those important facts, which then, in the course of our investigations, lead to an answer 472. The character of the belief in the uniformity of nature can perhaps be seen most clearly in the case in which what is cape the first of the property of the pro The magnet as time. What do you expect to be told, then? What only you capt a account for believing thin? What do you call a case for believing thin? What do you capt to be convinced? If these de root reasons, then what are reasons? If you say that these are not reasons, then the same and the reasons are reasons, then the same are not reasons. The reasons are reasons, then the same are not reasons, then the new t as the second to the back the back the fig. For this as a many of agreement to the property of the second to the s As the factors that the components are even so oct mouth, draw a breath, and holds it is not tent of tocases to set true.
